EXHIBIT A

LIST OF PRIOR INVENTIONS AND ORIGINAL WORKS OF AUTHORSHIP

Agreement: At-Will Employee and Contracting Agreement
Company: Haiven, Inc.
Employee: Brian Takita
Employment Commencement Date: July 29, 2026, or the actual first day of employment if changed in writing
Schedule Date: July 28, 2026

This schedule is the completed Exhibit A to the Agreement and may be attached as the additional sheets contemplated by the Company's Exhibit A form.

For purposes of this Exhibit A, "Prior Inventions" includes the inventions, original works of authorship, software, businesses, projects, materials, and other intellectual property made, conceived, acquired, owned, or administered by Employee before the Employment Commencement Date and identified below. A reference to a repository, organization, engagement, or business includes only Employee's rights and interests, if any. It does not claim ownership of third-party code, client work product, confidential information, licensed materials, or rights owned by another person or entity.

The categories below include the representative works identified in their descriptions and are not limited to those examples. Private repository names, client secrets, source code, credentials, and other confidential details need not be disclosed to identify the excluded body of work.

Title	Date	Identifying No. or Description
Personal software and open-source portfolio	Before the Employment Commencement Date	All Employee-owned repositories, releases, packages, documentation, specifications, designs, contributions, and related materials existing before the Employment Commencement Date under `github.com/btakita`, whether public or private. Representative works include `agent-doc`, `agent-doc-js`, `agent-kit`, `agent-loop`, `agent-memories`, `agent-resume`, `agent-rules`, `agent-runbooks`, `skill-harness`, `module-harness`, `corky`, `instruction-files`, `chromium-bridge`, `eval-runner`, `tsift`, `tagpath`, `tmux-router`, `homebrew-tap`, `webmaster`, `community-pulse`, `freehold`, `boost-client`, `lazily-rs`, `lazily-py`, `ctx-core`, `rappstack`, `briantakita.me-dev`, `philosophy`, `python-intentions`, `patchboard`, and related tools, integrations, packages, bindings, documentation, tests, and distribution infrastructure. Repository access or administration does not create an Employee ownership claim in third-party code.
Lazily and reactive-software ecosystem	Before the Employment Commencement Date	The Lazily libraries, specifications, formal models, ports, and bindings; reactive maps, collections, cells, signals, synchronization, CRDT, and related algorithms; `ctx-core`, `rappstack`, `rmemo`, and related frameworks, libraries, benchmarks, examples, documentation, and successor projects.
Agent, context, evaluation, and automation systems	Before the Employment Commencement Date	Pre-existing agent orchestration, document-session, realtime collaboration, memory, rule, runbook, skill, context-management, code-navigation, evaluation, correspondence, browser-control, and developer-tooling systems, including associated protocols, schemas, prompts, workflows, test suites, deployment methods, and know-how. This category includes private research and prototypes, including Patchboard and Patchboard MCP, without requiring disclosure of source code or confidential design details.
Controlled GitHub organizations	Before the Employment Commencement Date	Employee's rights, if any, in repositories and materials existing before the Employment Commencement Date under organizations owned or administered by Employee, including `rappstack`, `existence-lang`, `aurovlog`, `autostores`, `cogov`, `ctx-core`, `esmfile`, `foresight-host`, `hyopjs`, `lastinglogic`, `linkument`, `persontric`, `proseui`, `prosey`, `rebuildjs`, `relementjs`, `relysjs`, `rmemojs`, `rr`, `tag-vector`, and `wanimato`. Third-party rights and contributions are excluded from Employee's claim.
Contributions to third-party open-source projects	Before the Employment Commencement Date	Employee's copyrights and other retained rights, if any, in pre-existing contributions to third-party open-source projects, subject to the applicable licenses, contributor agreements, and third-party ownership. No third-party code or rights are claimed.

Title	Date	Identifying No. or Description
Personal sites, publications, and creative works	Before the Employment Commencement Date	`briantakita.me`, `briantakita.com`, personal portfolio and résumé materials, philosophy and ontology writings, presentations, articles, documentation, graphics, audio, video, domains, brands, and other pre-existing authored or creative materials.
MonsterRodHolders.com	Before the Employment Commencement Date	Employee's and the applicable owner's pre-existing rights and interests in the Monster Rod Holders business and `MonsterRodHolders.com`, including its domain, brand, trademarks, product designs, catalog, website, software, repositories, content, media, data, analytics, operations, automations, documentation, vendor materials, and business processes. Third-party and entity-owned rights remain with their applicable owner and are not transferred to Haiven.
Equity Funding Source	Before the Employment Commencement Date	Employee's and the applicable owner's pre-existing rights and interests in Equity Funding Source, including its domain, brand, website, private repositories, software, content, data models, workflows, automations, documentation, integrations, and business processes. Third-party, client, and entity-owned rights remain with their applicable owner and are not transferred to Haiven.
Apollo Solutions / Acadian Financial Services engagement	Before the Employment Commencement Date	Employee's pre-existing engagement through Apollo Solutions for work whose current end client is Acadian Financial Services, together with Employee-owned background tools, general methods, know-how, and materials, if any. Apollo, Acadian, and other third-party confidential information and work product remain governed by their separate agreements; Employee does not claim them, and they are not available for disclosure, use, or license to Haiven.
Other pre-existing consulting and business activities	Before the Employment Commencement Date	Employee's rights, if any, in other consulting relationships, independent businesses, advisory activities, client-neutral background technology, methods, templates, and tools existing before the Employment Commencement Date. Client identities and confidential details need not be disclosed unless reasonably necessary to evaluate a specific conflict. Third-party rights remain with their owners.
Private and unpublished projects	Before the Employment Commencement Date	All Employee-owned private repositories, unpublished code, prototypes, product concepts, inventions, research, experiments, models, designs, hardware work, writings, notes, prompt libraries, data sets, domains, brands, and other personal projects existing before the Employment Commencement Date, as evidenced by dated repository records, local version history, registrations, files, or other contemporaneous records. This category excludes materials owned by a client or other third party.
Pre-existing professional materials and know-how	Before the Employment Commencement Date	Reusable libraries, utilities, templates, architectures, algorithms, development environments, scripts, configurations, methodologies, techniques, processes, professional knowledge, and general skills developed or acquired before employment, together with Employee's pre-existing improvements and documentation.
Haiven interview take-home submission (`haiven-websocket-hub`)	July 2026, before the Employment Commencement Date	Employee's rights, if any, in the uncompensated pre-employment WebSocket-hub take-home design, implementation, documentation, tests, and reusable general-purpose components. Haiven's specifications, confidential information, trademarks, and any material already owned by Haiven are excluded. The submission is listed as a Prior Invention unless a separate writing signed by Employee and Haiven identifies specific ownership or license rights.

EFFECT OF LISTING

1. Employee retains full and exclusive ownership of Employee's rights in the listed Prior Inventions. Haiven has no ownership claim to a listed Prior Invention.
2. The listed Prior Inventions include all versions existing before the Employment Commencement Date and Employee's rights in their modifications, enhancements, updates, ports, bindings, derivative works, documentation, and successor projects. Continued maintenance or development during employment does not by itself transfer ownership to Haiven.
3. Listing, disclosure, evaluation, discussion, or permitted continuation of a Prior Invention does not itself grant Haiven an ownership interest or license.
4. If Employee incorporates a Prior Invention into a Haiven product, process, or machine with Haiven's prior written authorization, Haiven receives only the rights available under the Prior Invention's then-applicable published open-source license or under a separate written license signed by Employee and Haiven. No broader implied or automatic license arises from incorporation.
5. Nothing in this Exhibit A requires Employee to disclose source code, credentials, trade secrets, client information, or other material that Employee is not authorized to disclose.

INCORPORATION AND PRIORITY

This Exhibit A is incorporated into and forms part of the Agreement. If this Exhibit A conflicts with Section 3.4 or any other provision of the Agreement concerning the ownership, assignment, licensing, or permitted continuation of a listed Prior Invention, this Exhibit A controls.
