Proposed Exhibit A

List of Prior Inventions and Original Works of Authorship

Agreement: At-Will Employee and Contracting Agreement
Company: Haiven, Inc.
Employee: Brian Takita
Employment commencement date: July 29, 2026
Schedule date: July 28, 2026
Status: Proposed for review and incorporation into the final agreement

This schedule identifies inventions, original works of authorship, software, businesses, projects, materials, and other intellectual property made, conceived, acquired, owned, or administered by Employee before the employment commencement date ("Prior Works"). A reference to a repository, organization, engagement, or business includes only Employee's rights and interests, if any. It does not claim ownership of third-party code, client work product, confidential information, licensed materials, or rights owned by another person or entity.

The descriptions below identify categories and representative works; they are not intended to narrow the broader category in which a representative work is listed. Private repository names, client secrets, source code, credentials, and other confidential details need not be disclosed to identify the excluded body of work.

Title or category	Date	Identifying number or description
Personal software and open-source portfolio	Before July 29, 2026	All 335 repositories visible to Employee under `github.com/btakita` as of July 28, 2026 (292 public and 43 private), together with all Employee-owned releases, packages, documentation, specifications,

Title or category	Date	Identifying number or description
		designs, issue contributions, and related materials existing before the employment commencement date. Representative core works include agent-doc, agent-doc-js, agent-kit, agent-loop, agent-memories, agent-resume, agent-rules, agent-runbooks, skill-harness, module-harness, corky, instruction-files, chromium-bridge, eval-runner, tsift, tagpath, tmux-router, homebrew-tap, webmaster, community-pulse, lazily-rs, lazily-py, ctx-core, rappstack, briantakita.me-dev, philosophy, python-intentions, and related tools, integrations, packages, bindings, documentation, tests, and distribution infrastructure. Repository access or administration does not create an Employee ownership claim in a third party's code; only Employee's rights, if any, are reserved.
Lazily and reactive-software ecosystem	Before July 29, 2026	Lazily libraries and bindings; reactive maps, collections, cells, signals, synchronization, and related algorithms; ctx-core, rappstack, rmemo, and related frameworks, libraries, benchmarks, specifications, examples, and documentation.
Agent, context, evaluation, and automation systems	Before July 29, 2026	Pre-existing agent orchestration, document-session, memory, rule, runbook, skill, context-management, code-navigation, evaluation, correspondence, browser-control, and developer-tooling systems; associated

Title or category	Date	Identifying number or description
		protocols, schemas, prompts, workflows, test suites, deployment methods, and know-how. This includes private research and prototypes such as Patchboard and Patchboard MCP without disclosing their source code or confidential design details.
Controlled GitHub organizations	Before July 29, 2026	Employee's rights, if any, in repositories and materials existing before the employment commencement date under organizations owned or administered by Employee, including: `rappstack`, `existence-lang`, `aurovlog`, `autostores`, `cogov`, `ctx-core`, `esmfile`, `foresight-host`, `hyopjs`, `lastinglogic`, `linkument`, `persontric`, `proseui`, `prosey`, `rebuildjs`, `relementjs`, `relysjs`, `rmemojs`, `rr`, `tag-vector`, and `wanimato`. Third-party rights and contributions are excluded from Employee's claim.
Contributions to third-party open-source projects	Before July 29, 2026	Employee's copyrights and other retained rights, if any, in pre-existing contributions to third-party open-source projects, subject to the applicable licenses, contributor agreements, and third-party ownership. No third-party code or rights are claimed.
Personal sites, publications, and creative works	Before July 29, 2026	`briantakita.me`, `briantakita.com`, personal portfolio and résumé materials, philosophy and ontology writings, presentations, articles, documentation, graphics, audio/video, domains,

Title or category	Date	Identifying number or description
		brands, and other pre-existing authored or creative materials.
MonsterRodHolders.com	Before July 29, 2026	Employee's and the applicable owner's pre-existing rights and interests in the Monster Rod Holders business and `MonsterRodHolders.com`, including its domain, brand, trademarks, product designs, catalog, website, software, repositories, content, media, data, analytics, operations, automations, documentation, vendor materials, and business processes. Third-party and entity-owned rights remain with their applicable owner and are not transferred to Haiven.
Equity Funding Source	Before July 29, 2026	Employee's and the applicable owner's pre-existing rights and interests in Equity Funding Source, including its domain, brand, website, private repositories, software, content, data models, workflows, automations, documentation, integrations, and business processes. Third-party, client, and entity-owned rights remain with their applicable owner and are not transferred to Haiven.
Apollo Solutions / Acadian Financial Services engagement	Before July 29, 2026	Employee's pre-existing engagement through Apollo Solutions for work whose current end client is Acadian Financial Services, together with Employee-owned background tools, general methods, know-how, and materials, if any. Apollo, Acadian, and other third-party confidential information

Title or category	Date	Identifying number or description
		and work product remain governed by their separate agreements; Employee does not claim them, and they are not available for disclosure, use, or license to Haiven.
Other pre-existing consulting and business activities	Before July 29, 2026	Employee's rights, if any, in other consulting relationships, independent businesses, advisory activities, client-neutral background technology, methods, templates, and tools existing before the employment commencement date. Client identities and confidential details need not be disclosed unless reasonably necessary to evaluate a specific conflict. Third-party rights remain with their owners.
Private and unpublished projects	Before July 29, 2026	All pre-existing private repositories, unpublished code, prototypes, product concepts, inventions, research, experiments, models, designs, hardware work, writings, notes, prompt libraries, data sets, domains, brands, and other personal projects owned by Employee, as evidenced by dated repository records, local version history, registrations, files, or other contemporaneous records. This category excludes materials owned by a client or other third party.
Pre-existing professional materials and know-how	Before July 29, 2026	Reusable libraries, utilities, templates, architectures, algorithms, development environments, scripts, configurations, methodologies,

Title or category	Date	Identifying number or description
		techniques, processes, professional knowledge, and general skills developed or acquired before employment, together with Employee's pre-existing improvements and documentation.

Haiven-specific pre-employment materials requiring confirmation

Any Haiven-specific code or other material created before the employment commencement date, including the repository currently named `haiven-websocket-hub`, should be classified expressly in the final documents. This schedule does not assert Employee ownership of material already owned by Haiven or another party, and storage in an Employee-controlled account does not by itself determine ownership. Conversely, no Employee-owned pre-employment material becomes Haiven property merely because it was discussed with, evaluated for, or later used by Haiven. The parties should identify the applicable owner and any license in writing before signing.

Effect of listing

1. The Prior Works remain excluded from "Company Inventions," "Work Product," and any other assignment to Haiven. Haiven has no claim to a listed Prior Work.
2. Continued maintenance, modification, enhancement, release, or derivative development of a listed Prior Work does not by itself transfer ownership to Haiven.
3. Haiven receives no ownership or license merely because a Prior Work is listed, disclosed, or continued during employment.
4. A Prior Work may be incorporated into a Haiven product only with prior written authorization. Haiven receives only the rights available under the applicable published open-source license or a separate written license signed by Employee and Haiven; incorporation does not create a broader implied or automatic license.

5. Nothing in this schedule requires Employee to disclose source code, credentials, trade secrets, client information, or other material that Employee is not authorized to disclose.

Proposed accompanying clause for future outside work

The following should appear in the final agreement or a countersigned addendum, rather than being treated as a Prior Work that already exists:

> **Future Outside Activities.** Employee may undertake future consulting, advisory, business, investment, educational, creative, research, open-source, and other independent activities. Employee will disclose a new paid engagement in writing before beginning it when reasonably practicable. General-purpose open-source work, personal research or creative work, and passive investments do not require separate approval unless they present an actual conflict with Employee's Haiven duties. An outside activity is permitted if it does not materially interfere with Employee's duties to Haiven, use or disclose Haiven Confidential Information, or constitute work assigned to Employee by Haiven. The Company may object to a disclosed paid engagement only on reasonable, specific conflict, confidentiality, or material-interference grounds stated in writing within ten business days after disclosure; otherwise, the engagement is deemed approved. Unanimous Board approval is not required. Approval will not be unreasonably withheld, conditioned, or delayed and will not be revoked retroactively. All compensation, equity, work product, inventions, intellectual property, and confidential information arising from a permitted outside activity remain with Employee or the applicable third party, as their governing agreements require, and Haiven acquires no ownership or license merely because the activity occurs during Employee's employment. Any later conflict concern will be addressed prospectively and in good faith. Employee will not be required to disclose another party's confidential information to obtain or retain approval.

Acknowledgment

The parties acknowledge that this schedule is incorporated into and forms part of the Agreement. If this schedule conflicts with the Agreement regarding the ownership, assignment, licensing, compensation, or permitted continuation of a listed Prior Work or approved outside activity, this schedule and the accompanying clause control.
